

**RÉGENS LOGISTICS® - INTERNATIONAL SHIPPING**

---

## DESCRIPTION

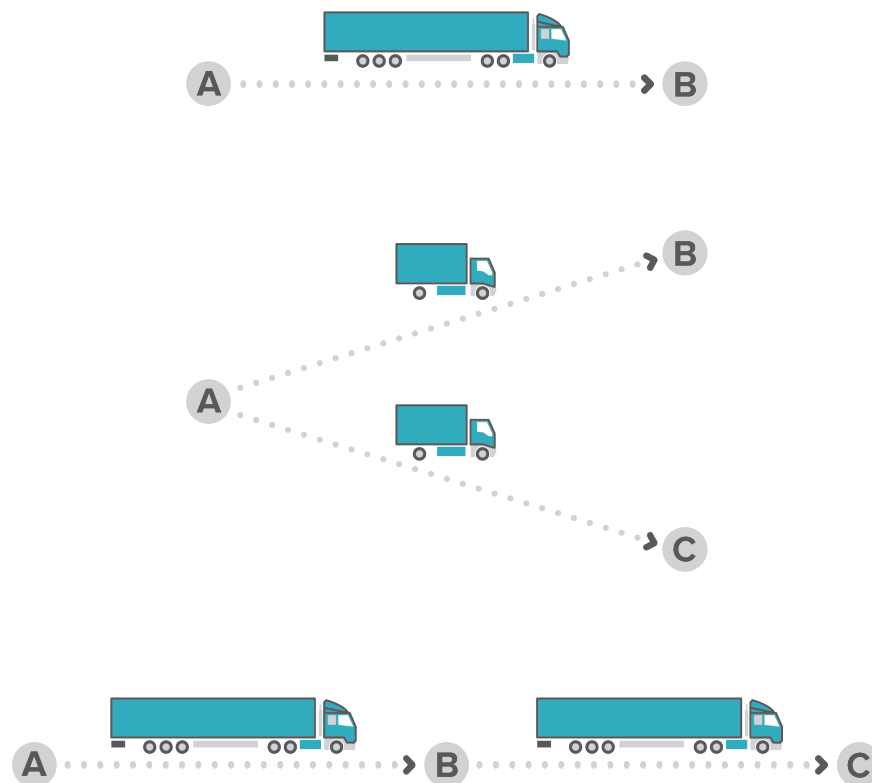

---

The purpose of Régens Track programs is to provide a flexible freight forwarding software solution which allows your company to deliver real time order tracking and management, to maximise efficiency with faster ordering and invoicing processes and control costs.

Our Track2016 program module is based on our professional experience of freight forwarding system.

Track2016 program module is primarily designed to support shipping tasks related to international Full Truckloads and Less Than Truckloads.

Supporting of freight forwarding processes, receiving complete and part load orders and tracking of goods are well working functions in the program.
